

Applying mats to Pages

1. First, stick photos to reverse of mat with adhesive tape.

2. Then, peel back approximately 80mm (3 inches) of adhesive tape liner in each corner.

3. Next, position mat onto page, ensuring it is lined up in each corner. **Try to not let exposed adhesive tape touch the page.**

4. Once you are certain the mat is in the correct position, push down each corner of the mat and then begin removing the tape liners.
